

ALSS Environmental Policy Statement

Advanced Life Safety Solutions Ltd are committed towards an Environmental Policy that ensures to consistently meet Clients needs and expectations. We aim to achieve these in a safe, responsible, ethical, sustainable, and environmentally sound way, in accordance with our policies, procedures and the company's strategic direction. We will actively promote and administer a strong environmental culture amongst our staff and our sub-contractors.

To assure these objectives are realized, we have established a Management System incorporating the requirements of ISO14001:2015.

ALSS Management Team is committed to the following; leadership, implementation, development and continuous improvement of the Management System, policies, work practices, procedures and competencies to meet the developing needs of our clients, regulatory, statutory and other requirements, including reducing demand on natural resources, reducing waste and increasing recycling (wherever practicable).

The Management Team will adopt a risk-based strategy to identify, assess and raise awareness of environmental risks and opportunities; implementing processes and procedures to prevent and mitigate negative risks whilst pursuing positive risk opportunities.

The communication of the Management Teams commitment to the management system is via this policy statement, publication of Company Policy, procedures, work instructions, and day to day communications. All employees are encouraged to participate in the development of the management systems, environmental processes and safe systems of work including any relevant improvement projects.

Company policies, objectives and targets are established and reviewed during 'Management Review'. Objectives can also be established via legislation changes, periodically by Management directives and meetings, and for specific project works.

Information, training, equipment and supervision will be provided to employees according to task and business needs, in order to perform their duties competently and safely. All personnel shall work with consideration for their own safety and the environment, and others who may be affected by their acts or omissions.

It is the responsibility of management and employees to understand and apply this policy, associated procedures, practices and project/product specific documentation in all aspects of their responsibility areas and continue to maintain our high standards and reputation. This policy and associated procedures are monitored by internal and external audit and inspection.

A copy of this Policy is displayed in reception and is available to other interested parties, and is communicated to employees and persons working on our behalf.

As Compliance Manager I have overall responsibility for this policy and have allocated all necessary resources for its implementation and ongoing compliance.

Ryan Roberts
